### *Problem (public)*

During the installation of “KOMPAS-3D” appears an error message: “Error during installation of assembly Microsoft.MSXML2R,version=...”. Installation is interrupted.

### *Solution (public)*

You need to install/reinstall the MSXML component. Then run the installation of “KOMPAS-3D” again.

You can download the component by following the link([1]Description of an update for Microsoft XML Core Services 4.0 Service Pack 2 | Microsoft Support)

You’ll also need to reinstall Microsoft .NET Framework, using the repair tool by following the link([2]Download Microsoft .NET Framework Repair Tool from Official Microsoft Download Center)
