Guardant license

Problem (public)

Instructions for using the Guardant License Wizard utility

Solution (public)

Attention! When using on an OS without a graphical shell (GUI), use the utility's output to a virtual monitor (for example, the `xserver-xorg-video-dummy` package). Calling help when working with the utility on the command line using the parameter `--list`

Attention! On the PC where the software key with network licenses will be used, before activating or transferring the key, install the Guardant Control Center (GCC) license manager (GCC must also be installed on Linux OS, even if the licenses on the key are used locally)
<https://sd.ascon.ru/otrs/public.pl?ItemID=1588>

Attention! After activating the software key: when replacing the hardware, VM settings, or transferring/migrating the VM to another PC, the software key will be locked. If necessary, make changes: create a transfer file for the program key, make changes or transfer the VM, and return the program key using the transfer file.

License wizard

for Windows OS:
[1]license_wizard.exe
[2]license_wizard.zip

for Linux OS
[3]license_wizard.tar

Contents:
[4]1. Configuring the license wizard utility

[5]2.1 Activating the Guardant DL software key on an Internet-connected computer
[6]2.2 Activating the Guardant DL software key on a computer not connected to the Internet

[7]3.1 Updating the key on an Internet-connected computer
[8]3.2. Updating the key on a computer that is not connected to the Internet.

[9]4. Working with the utility from the command line

1. Configuring the utility License Wizard Guardant
At the first launch, you will need to specify the address of the ASCON license activation server.
Go to the "Settings" menu and specify the server address:
<https://license.ascon.ru:9000>

2.1 Activating the Guardant DL program key
Run the utility The Guardant License Wizard and click "+ License activation"

Select "On this computer", copy the serial number into the field that appears and click "Get a license"

A message about successful activation will appear and the activated products, the components they contain and the license restrictions will be shown.

2.2 Activation of the Guardant DL software key on a computer not connected to the Internet

2.2.1 Creating an offline activation request on a computer without an Internet connection

The button +License activation
In step 1, select On this
In step 2, click the Offline activation button, then the button Save
Copy the created .request file to a computer with an Internet connection

2.2.2 Creating a program key activation file on a computer with an Internet connection

The button+License activation
In step 1, select On the other
In step 2, click Continue
In step 3, click Select the file and specify the path to the .request file.
Then enter the serial number (activation code of the software key) in the line that appears and click Activate the new license.
In step 4, click Save and specify the path to save the .license file
Copy the created .license file to a computer without an Internet connection

2.2.3 Using the program key activation file on a computer without an

Guardant license wizard

02/05/2025 10:36:02

Internet connection

The button+License activation

In step 1, select On this

In step 2, select the License file or transfer file, click select file and specify the path to the .license file

3.1 Updating the key on the computer connected to the Internet

Run License Wizard Guardant and in the line with the key on which you want to update the licenses, click "Install update"

Attention! If the "Install Update" button does not appear: Click the "Check for updates" button."

It takes a few seconds to update the key, and a corresponding message will appear after the update.

If the list of licenses is based on the key displayed in the utility interface License Wizard Guardant, has not changed, restart the utility.

3.2. Updating the key on a computer not connected to the Internet.

Algorithm:

- on Computer No. 1, where the key is located, but which is not connected to the Internet, create a file in license wizard .update.request.

Copy the activation.request file on computer No. 2 that has an Internet connection Use the file in the license wizard utility.update.request to receive the update file.license

Copy the update file.license on computer No. 1, which is not connected to the Internet on Computer No. 1 that is not connected to the Internet in license wizard complete activation of the update.license file

To get started, launch the application license wizard and in the line with the key on which you want to update the license, in the drop-down menu, click "Offline update"

Then follow the tips of the application license wizard

4. Working with the utility from the command line
