print, characters, diameter, degree

Problem (public)

Some printer models (HP LaserJet 1200 etc) print empty polygons instead of special characters (diameter, degree for example). How to print special characters?

Solution (public)

There are two ways to solve the problem, if PCL6 or PCL5e printer driver is installed: * Set True-type font printing to raster type in the printer settings. For example you should enable "Send TrueType as raster" (Finishing tab-Information) in HP Laser Jet 1200 printer settings. * Replace Printer driver by PostScript-driver.
