State:	public (all)		

Keywords

A0, 1:1, scale

Problem (public)

Impossible to print A0-drawing by Plotter with 1:1 printing scale, although Plotter features allow this.

Solution (public)

In print preview mode enter the Plotter settings and set custom paper size so the printing area would be larger than standard A0-size (1189x841) before printing. Plotter driver is usually set printing area to the difference between paper size and unprintable areas.
