**Problem (public)**

I'm trying to print A4 drawing with laser printer of A4 format. Why does KOMPAS break my drawing to 4 sheets, although all of them can be printed to one sheet?

**Solution (public)**

Real Print area (which exactly used by Output driver) much smaller then A4 standard size. Therefore A4-drawing can't be wholly printed on A4-paper. There are two ways to solve the problem:
- Scale back print scale (set its value about 0.95);
- Print on 4 sheets and then stick them together.
