### Keywords

HASP, nethASP, HASPnet, driver

### Problem (public)

On which computer do I need to install the HASP4 Device Driver?

### Solution (public)

You are to install HASP-driver of the appropriate version on all the computers, where KOMPAS has been installed.  
If you use HASP4 Network key (red in color) you are to install HASP4 Device Driver and License Manager on the computer to which this key is connected too.
