[FAQ Article Print](#)**Category:** FAQ in English::Software Protection::HASP4**State:** public (all)**Last update:** 12/26/2019 20:21:25

Keywords

HASP, net, license, manager, several, two

Problem (public)

There are two HASP license managers in the network, each of them serves its own HASP4 Net key.
How can I configure using licenses for these keys for certain users or groups?

Solution (public)

You may limit stations range for every license manager, see "Total_HASP.pdf" in attachment.
