Keywords

HASP, license, release

Problem (public)

Can HASP License Manager release a license automatically?

Solution (public)

Yes. HASP LM Log Table keeps information about all the stations logged in. If some station does not communicate with this HASP LM for the predefined period of time, this station will be logged out automatically. The predefined period for KOMPAS V8 Plus is 36 hours, the predefined period for KOMPAS V9 and higher is 80 minutes.
