### Keywords

demo, demo-mode, license, HASP

### Problem (public)

My license is already activated for KOMPAS-3D and libraries, I can see the key and its licenses in Admin Control Center ([http://localhost:1947/\\_int\\_/devices.html](http://localhost:1947/_int_/devices.html)), but KOMPAS-3D starts in demo-mode still.

### Solution (public)
