Problem (public)

Using MST files while installation from MSI package.

Solution (public)

Creating of MST files

- Start Orca
- Open .msi (Renga.msi)
- Click Transform → New Transform
- Change parameters in the Property table
- Click Transform → Generate Transform
- Save as Renga.mst
- Close Orca without saving of Renga.msi

Parameters of MST files

The Property table

- INSTALL_LICENSE - path to the license file (e.g. C:\Temp\license.lic)
- INSTALL_DIRECTORY - install directory (e.g. C:\Temp\Renga)

Installation

msiexec.exe /qb /i Renga.msi /L RengaInstall.log TRANSFORMS=Renga.mst

Help

- [1]Orca

Orca installation

Following SDK from Microsoft contain Orca:
- Windows® Server 2003 SP1 Platform SDK
- Windows SDK for Windows 7 and .NET Framework 3.5 SP1
